Beware: like me, you may be unable to actually play this game.

For some reason, the list shown under "New Campaign" remains empty.

Although this is a known bug, none of the proposed fixes online worked for me.... GHOSTS, ARTHUR, AND ROME. JUST LIKE THE HISTORICAL FACTS!. I like this game.. A hot steamy pile of crap.. I think we can sum this up with the question, "Why did I even bother?" Diplomacy? Slave to the story line, "Why did I bother?" Quest choices? The same. make the choice that fit the story line or, "Why did I bother?"

If my choices don't matter, I may as well play CoD.. good graphics, intense fights. Just right up my street.

I enjoyed this RTS, it has some really cool mechanics and the quests inside it are rather immersive.

The game, however, lacks replayability. Considering how cheap it is, I'd recommend it.. This game is recommended for ppl that loves RPG games, the whole game has an beautiful history, and a cool theme . Have been playing for a while and i can call it a good game , but only if you pay a good price for it. After some hours you just dont care anymore with the quests and story things , you just click the first option that appears and go to a battle, that happens a lot, and often you realize that the previous options wouldn't make a difference after all .The battle is a problem, if you compare the role-play battle mechanics of this game with some other of the same style like Total War etc.. you'll find the game stays behind on that point . Well , just as i said, its worth buying it on a promo or something like that , you will like it and wont regret after all.

7.5/10 :). This review is about King Arthur II:The Role playing Wargame but in the current Steam deal other Arthurian games are included and they seem pretty good as well, just older..First up the game looks pretty good,runs fine in Windows 7 64 bit,it even manages to look,I think,like Britain.Nah I don't mean its raining all the time and the M25 wagon track is gridlocked yet again I mean the green and pleasant land aspects of Britain.Battles are fine, lots of units, control is ok I would like to get in a bit closer but can not unfortunately,might be me, but the usual Total War tricks don't get you at some footmans armoured shoulder. Never mind. Also may not be the best game for the seriously paranoid as your magic seems pretty damned feeble but what the AI is zapping you with is whamo straight off the main grid.Music fine, voice acting ok,role play seems to be choose between ending up a really nice guy or a complete card carrying prat and the only bug I have encountered so far is that start and end the game will lock up promptly if you don't move your mouse.Other than that this is lots of pretty good wargamery for not much cash with the current deal. Check it out.....
